

Claims:

What is claimed is:

- 5 1. A composition comprising:
 - (a) micro-granules comprising a proton pump inhibitor coated with an enteric coating; and
 - (b) a liquid suspension vehicle having a pH less than 6.0 and having a viscosity sufficient to suspend the micro-granules.
- 10 2. The composition of claim 1 wherein the micro-granules are between 100 μm and 900 μm .
3. The composition of claim 1 wherein the composition has a viscosity of greater
- 15 than 500 cP.
4. The composition of claim 3 wherein the active ingredient is lansoprazole.
- Rule 1426 5. A method of treating a patient with a gastrointestinal disorder comprising
- 20 providing to the patient a composition comprising micro-granules of an enterically coated proton pump inhibitor and a liquid suspension vehicle having a pH less than 6.0 and a viscosity sufficient to suspend the micro-granules.
- 6.
7. A kit comprising:
 - 25 a) a first container comprising micro-granules comprising a proton pump inhibitor coated with an enteric coating; and
 - b) a second container comprising a liquid;

wherein the first or the second container further comprises an acidic excipient and wherein the first or second container further comprises a thickening agent

- 30 such that when the contents of the first and second container are combined, the resulting liquid has a viscosity sufficient to suspend the micro-granules.
- 7.
- 8. The kit of claim 7 wherein the proton pump inhibitor is lansoprazole.

Amended 1.12.16

8.
~~9.~~

The kit of claim 8 wherein the viscosity of the liquid is greater than 500 cP.

9.
~~10.~~

The kit of claim 7 wherein the micro-granules are between 100 μm and 900 μm .
